Description:

A comprehensive survey of the law and techniques associated with the law, science, and economics involved in natural resource damage assessment. Written by experts in the field, this new deskbook is the most comprehensive and up-to-date analysis of the subject available. It thoroughly examines the framework for liability and the goals of the federal statutes providing a right of action for natural resource damages. Focus is maintained on the natural resource damage provisions of CERCLA; OPA; the Clean Water Act; the Marine Protection, Sanctuaries, and Research Act; and the National Park System Resource Protection Act.
